

MANEESH ANAND

Data Analyst — Business Data Analyst — Data Automation Analyst
United States
pedellianand01@gmail.com

[LinkedIn](#) [GitHub](#)

Professional Summary

Data Analyst with a Master's degree in Computer Science and experience building automated reporting solutions, SQL-driven analytics, ETL workflows, KPI monitoring systems, and business intelligence reporting platforms. Skilled in SQL, Google BigQuery, Python, data normalization, data validation, workflow automation, dashboard development, root cause analysis, and scalable data pipeline development. Experienced in designing automated data processes, performing complex data analysis, documenting technical workflows, and delivering business insights through data-driven solutions.

Technical Skills

Programming Languages: Python, SQL, R, JavaScript

Databases: Google BigQuery, MySQL, PostgreSQL, MongoDB

Data Analytics: Data Analysis, Data Profiling, Data Normalization, Data Validation, Data Transformation, Data Quality Analysis, Root Cause Analysis, Trend Analysis, Business Analytics

Data Engineering: ETL Pipelines, Automated Data Workflows, Data Ingestion, Data Aggregation, Workflow Automation, Stored Procedures, Data Monitoring, Data Delivery Pipelines

Business Intelligence: Power BI, Dashboard Development, KPI Monitoring, Performance Reporting, Data Visualization, Operational Reporting

Cloud Platforms: Google BigQuery, AWS (S3, EC2, Lambda), Azure Fundamentals

Tools: Git, Docker, Linux, Jupyter Notebook, Excel

Methodologies: Agile, Scrum, Sprint Planning, Backlog Grooming, CI/CD Fundamentals

Professional Experience

Project Team Lead

Oct 2024 – Feb 2025

University of Central Missouri, Missouri, United States

- Developed automated operational reporting solutions and KPI monitoring dashboards.
- Designed SQL-based workflows supporting occupancy tracking, utilization analytics, and revenue reporting.
- Built normalized database structures supporting scalable reporting and operational analytics.
- Developed automated reporting processes that reduced manual reporting effort and improved data accessibility.
- Performed validation and monitoring of operational datasets to ensure reporting accuracy.
- Created workflow documentation, business rules documentation, and reporting specifications.
- Collaborated with stakeholders to translate operational requirements into reporting solutions.
- Participated in Agile ceremonies including sprint planning, backlog refinement, reviews, and retrospectives.

Machine Learning Engineer Intern

Jul 2023 – Nov 2023

Cognibot, Chennai, India

- Performed data profiling, exploratory analysis, transformation, and validation on structured and unstructured datasets.
- Developed SQL queries supporting operational reporting and analytical workflows.
- Conducted trend analysis to identify patterns and opportunities for process improvement.

- Documented data sources, business rules, transformation logic, and reporting requirements.
- Performed root cause analysis on data quality issues and implemented corrective recommendations.
- Supported ETL and data integration workflows for analytics projects.
- Maintained technical documentation and analytical reports for stakeholders.
- Collaborated with cross-functional teams in Agile/Scrum development environments.

Data Analyst

Oct 2022 – May 2023

Brane Enterprises, Hyderabad, India

- Developed complex SQL queries and automated reporting workflows supporting business operations.
- Built KPI dashboards and recurring reports for operational and financial performance monitoring.
- Performed data normalization, transformation, validation, and quality checks on enterprise datasets.
- Conducted trend analysis and root cause investigations to identify reporting anomalies.
- Automated recurring reporting processes, reducing manual effort and improving reporting efficiency.
- Collaborated with stakeholders to gather reporting requirements and translate them into technical solutions.
- Documented reporting workflows, transformation logic, and business rules.
- Supported data-driven decision making through analytical reporting and performance monitoring.

Projects

Automated Data Analytics and Monitoring Platform

- Developed SQL and Google BigQuery scripts to automate data ingestion, normalization, transformation, and reporting workflows.
- Built automated KPI monitoring dashboards and alerting mechanisms to identify anomalies and threshold breaches.
- Designed ETL pipelines delivering structured datasets to business intelligence and reporting teams.
- Created stored procedures and scheduled workflows supporting automated reporting processes.
- Performed complex trend analysis and root cause investigations to improve operational visibility.
- Implemented automated validation checks ensuring reporting accuracy and data quality.
- Documented workflow schedules, transformation logic, reporting requirements, and technical specifications.
- Collaborated with stakeholders to translate operational requirements into scalable analytical solutions.

EZ Parking Lot Management System

- Developed SQL-based reporting workflows supporting occupancy, revenue, and utilization analytics.
- Designed normalized database schemas for vehicles, users, bookings, and payment transactions.
- Built operational dashboards and KPI reporting solutions for business users.
- Implemented automated analytics processes to improve operational visibility and reporting accuracy.
- Developed REST APIs supporting data delivery and reporting functionality.
- Created technical documentation, workflow diagrams, and reporting specifications.

Forest Cover Type Prediction

- Performed exploratory data analysis and feature engineering on environmental datasets.
- Developed SQL and Python workflows for data transformation and preprocessing.

- Conducted trend analysis and data validation to improve dataset quality.
- Generated analytical reports and performance metrics supporting model evaluation.

Education

Master of Science in Computer Science
University of Central Missouri, United States

2025

Certifications

- Google Advanced Data Analytics Professional Certificate
- AWS Machine Learning Certification
- Microsoft Azure Data Fundamentals (In Progress)
- Google BigQuery Fundamentals (In Progress)
